

# Get up and stronger with Armi Activechair!

- Senior chair with patented mechanism
- Fulfils Medical Device Directive (MDD) requirements
- CE marked medical device
- Finnish design

Armi Activechair is an unique innovation which helps the elderly to get up and activate their own muscles. Perfect for those with joint or back problems.

Armi senior chair strengthens muscles and improves balance. Those with weak leg muscles can stand up from Armi unassisted - without pain!

**Every Armi is made to order according to individual needs to provide best ergonomics.**

- Comfortable and versatile armchair. Ergonomic and elegant design.
- Brilliant senior fitness tool. A functional piece of furniture for your home.
- Helps those with weak muscles or having knee, back or hip problems.
- Reduces lifting work load at nursing homes and hospitals.

Armi's unique feature is a tilting seat and armrests that ensure that the right muscles are used.

**For more information please check our website and product videos.**
